

JOSIAH WHITE

✉ jwhite010305@gmail.com  github.com/jwhite135  josiahawhite.com

Education

University of South Carolina

Expected Graduation: May 2027

Bachelor of Science in Computer Science, Minor in Data Science

Columbia, SC

- Honors College — **GPA: 3.92 / 4.0**
- Coursework: Data Structures & Algorithms, Applied Machine Learning, Database System Design, Software Engineering

Work Experience

Data & Business Applications Intern

May 2026 – Aug 2026

CEEUS Inc.

Columbia, SC

- Built **data analysis** tools for sales and warehouse departments, driving transparency and efficiency across teams
- Wrote and optimized **SQL** queries, views, and stored procedures against the ERP/CRM database to power dashboard pipelines
- Designed an **interactive inventory management training tool** for new staff, creating a reusable onboarding resource for future hires

Software Engineer

Nov 2025 – Present

Center for Industry Solutions

Columbia, SC

- Contribute to **Cerberus**, an anomaly-based intrusion detection system, by preprocessing and analyzing **900K+ network flow packets** across **8 traffic classes** to support model training and evaluation
- Fine-tune a pretrained deep learning model (**NetFound**) on cybersecurity traffic data using **Hugging Face** and Python-based tooling

Provost Undergraduate AI Fellow

Mar 2026 – Present

University of South Carolina

Columbia, SC

- Awarded a **\$5,000 fellowship** to conduct AI research on **cultural bias** in AI and large language models
- Study cultural bias in **LLM outputs** through literature review, experimental design, and technical analysis

Undergraduate Research Assistant

Aug 2025 – Present

University of South Carolina

Columbia, SC

- Secured a competitive research grant to design and implement a **RISC-V** instruction set interpreter and virtual machine in **C++**, simulating 120+ instructions, memory, and register operations for real-time instruction flow simulation

Projects

CockBots - AI-Driven Social Media App | *Source Code*

PHP | SQL | Python

- Developed an **AI-enabled social media application** featuring bot-detection within a full-stack web platform
- Recognized with **Best in AI** and **Best in Implementation** at CockyHacks 2024

Class Finder - Cloud-Native Enrollment Platform | *Enterprise-taught systems course*

C# | .NET | Azure

- Led **SQL** development on a 6-person Agile team, designing an **Azure SQL Database** schema for real-time enrollment
- Built **REST APIs** in **C# (.NET Core)** and integrated Azure cloud services across a fully cloud-native platform

Leadership

Kappa Theta Pi - Professional Technology Fraternity

Mar 2025 – Present

Executive Secretary, Founding Member

Columbia, SC

- Co-founded USC's first professional technology fraternity, growing the organization to **50+ members**, **9 projects**, and partnerships with **10+ nonprofits**

Product Manager, ktpusc.com

Aug 2025 – Dec 2025

- Led product coordination for the fraternity website, managing a **5-person development team** through **Jira** sprint planning and **GitHub** pull request review

Product Manager, heritagelib.org

May 2026 – Aug 2026

- Led a **Python-based AI RAG** integration for a nonprofit website, making **6000+** documents accessible to the chatbot

Skills

Programming Languages: Python, Java, C++, SQL, JavaScript

Tools/Frameworks: Git, Spring Boot, React, PostgreSQL, pytest, REST APIs, Linux, Jira, Docker, Azure, Power BI, PyTorch, TensorFlow

Certifications: NVIDIA Deep Learning Institute — Introduction to Deep Learning; Building RAG Agents with LLMs
